

Mason Utility Rate Schedule

All rates are per family units. For single and multi-family units and trailer parks where more than one family is being service from one water meter, the average water usage per unit is to be determined by dividing the monthly water usage by the family units being served. Average water usage per unit is to be used in computing the water charge. The total charge is the charge per unit multiplied by the total number of units being served.

Water Rates **				Sewer Rates **	
Base Charges				Base Charges*	
Residential Inside	Commercial Inside	Residential Outside	Commercial Outside	Residential	Multi Family/Commercial
\$12.53	\$23.35	\$18.80	\$35.02	\$23.54	\$21.80
